Subject: DOCKET NO. SDWA-10-2013-0080 / Groundwater Monitoring Well Installation Activities - Monday, July 1, 2013 Update

Rene

The following tasks were completed Monday, July 1, 2013. Monitoring well YVD-11 was drilled to 117 feet bgs the day before with no observed water. However, a water level was gauged in the drill casing the morning of July 1 at 103.7 feet bgs. Cascade installed the well with the screen set at 97 to 117 feet bgs. Centralizers were attached to the well casing at 46, 96, and 116 feet. Cascade installed the filter pack to 94 feet and sealed the annulus to 3 feet below ground surface with bentonite chips hydrated as they were placed. Cascade moved the rig to DC-05D (located approximately ¾-mile south of YVD-11) and hand cleared down to 5 feet.

Planned work for the rest of the week includes the following:

Tuesday – Drill DC-05D to total depth (anticipated to be approximately 115 feet bgs based on the water level recorded on the boring log for DC-05).

Wednesday – Work half day working on surface completions at YVD-07 and YVD-11.

Monitoring well installation activities will resume Monday, July 8.

Let me know if you have any questions.

Best regards,

Tom
